EDUCATION

Singapore University of Technology and Design (SUTD) **Singapore**
• Bachelor of Engineering with Honors (Engineering Systems Design) Minor in Human-Centred Design **Sept '24 to Present**
• Specialization Track: Business Analytics and Operations Research

Temasek Polytechnic (TP) **Singapore**
• Graduated with a Diploma in Mechatronics (CGPA: 3.77) **Apr '19 to Apr '22**

WORK EXPERIENCES

The Robot Company, Robotics Engineer *AI Robotics Deployment* **Singapore**
• Engineered and deployed full-swerve robotic system for AI Engineer Singapore 2026. **May '26**
• Coordinated end-to-end logistics and deployment planning bridging technical execution and operational delivery.

Aptura, Project Manager *Data labelling for frontier AI foundation models* **London, UK**
• Implemented operations workflow to manage 50+ finance experts (previously 6) for AI data labelling. **Oct '25 to Nov '25**
• Streamlined onboarding process and resolved cross-domain bottlenecks, improving onboarding efficiency by 3-4x.
• Developed data analytics process to track payments and efficiency of finance experts in-person and remote.
• Collaborated closely with technology team to implement data-driven dashboards.

Ezer Labs, Robotics Intern *AI Robotics piloting VLA (Vision Learning Action) Robots* **London, UK**
• Developed swerve-drive mobile base (physical and simulation on Isaac Sim, Webots) for AI robots. **Sep '25 to Oct '25**
• Designed and implemented electrical and mechanical schematics to achieve balance between battery life, weight, payload, etc.
• Experimented with VLA training policies.

Osteopore, Manufacturing Intern *Local Biomedical SME focused on regenerative solutions* **Singapore**
• Major Project: Designing of bending mechanism proven to increase system process by 40%. **Mar '21 to Aug '21**
• Applied Six Sigma Lean Manufacturing to conduct test protocols for improving 3D printed parameters without causing design defects for 3 different products. (Achieved 150%, 159%, 187% increment in preliminary findings).
• 50% boost in productivity within production floor during product realization.

Halogen Foundation, Associate Volunteer **Singapore**
• Served as a mentor, fostering student confidence, collaboration and curiosity in learning environments. **Jan '19 to May '22**
• Led and facilitated business and leadership training modules for secondary school students, focusing on the development of entrepreneurial mindset, strategic thinking and core soft skills.

ACADEMIC RESEARCH PROJECTS

Infineon Technologies **Singapore**
Data & Business Analytics, Client Project **Jan '26 to Apr '26**
• Recipient of Credit Bureau Singapore Data and Business Analytics Project Award 2026
• Architected a fully functional Multi-Modal Retrieval Augmented Generation (RAG) pipeline.
• Engineered a dual-path hybrid search architecture with a custom score fusion matrix to eliminate data loss.
• Achieved 96% overall accuracy score using an automated LLM-as-a-judge evaluation framework.

Singapore University of Technology and Design **Singapore**
What The Hack 2024, Participant **Dec '24**
• Integrated software to track phone activity and dynamically update an LED-based health bar display.
• Design and prototype a physical interactive device aimed at improving mental wellness and reducing screen time.

CO-CURRICULAR ACTIVITIES

Temasek Polytechnic Swimming & Lifesaving **Singapore**
Captain, Swimming Team **Apr' 20 to Apr' 22**
• Led the team to back-to-back Championship Titles (POL-ITE & IVP Games)
• Conducted online and physical training during COVID-19.

ADDITIONAL INFORMATION

- Technical Skills: Project Management, Python, SQL, R, C++
- Tools/Software: Autodesk Fusion, Rhino 7, SolidWorks, WeBots, Isaac-Sim
- Language Proficiency: English, Chinese
