

4 May 2022

TO WHOM IT MAY CONCERN

Joash Lim Si Kai graduated from the School of Engineering, Temasek Polytechnic, with a Diploma in Mechatronics in May 2022.

Throughout his polytechnic studies, Joash maintained excellent academic results and graduated with a cumulative GPA of 3.77. He was conferred the Director's List in Year 2. He is confident, creative and exhibits excellent communication and inter-personal skills.

Sheer determination spurred Joash to achieve impressive grades as well as accomplishments outside the classroom. Swimming proved pivotal to Joash's growth. He was Captain of TP's Lifesaving & Swimming Team from 2020 to 2021 and was instrumental to their successes in the 2020 to 2021 POL-ITE Games. The sport shaped him physically, mentally and emotionally, with a training regimen not for the faint heart. His discipline and perseverance saw him win the CCA Merit Award (Sports) and Sports Colours Award in 2020, and a CCA Dedication Award in 2021.

Joash did his internship with Osteopore International where he worked on optimising the print design of extrusion machines that produce medical implants. Mature and self-driven, Joash delivered beyond work expectations during his Internship from Apr to Sep 2021. The Supervisor praised his strong analytical & design skills where he designed and developed a bending mechanism that can achieve a passing rate of 40% in the shaping process.

A meticulous and mature individual, Joash is able to multi-task and work well under pressure. He is a very good team player with excellent leadership skills. His thirst for learning and aptitude for research and innovation plus his consistent dedication in all that he does, augur well for Joash's future, whether in work or in academia.

We wish Joash all the best in his future endeavours.

Yours sincerely,

Chan Choy Peng (Ms)
Course Chair, Diploma in Mechatronics
